Dictation

Intelligent speech-to-  
text solutions  
tailored to meet your exact needs

## Speech-to-text solutions from Philips

### Achieve greater focus thanks to voice- controlled documentation

Seamless cooperation and efficient processes are essential in a fast-paced work environment. Quick and effective communication is the key to success in today's complex business world.

It is not only processes that are becoming quicker and more complex, mobility is also playing an increasingly important role in our professional lives. On top of this comes the pressure of having to be even more flexible and productive no matter where you're working from, often without any additional resources.

The answer lies in the diverse speech-to-text solutions from Philips, which make transcription and document creation quick, easy, and reliable.

## Create documents faster and more efficiently

Philips has a wide range of software solutions to integrate dictation and transcription into effective workflow processes, which makes complex daily tasks easier and improves the efficiency of communication.

Speech-to-text solutions from Philips help businesses become more efficient, profitable, and successful. Being able to work while you're on the go means you can be productive no matter where you are, be it at home or on the train coming back from a meeting with a customer. The software unites team members and helps eliminate downtime in the document creation process.

From automating and optimizing dictation and transcription workflows between internal staff, offering speech recognition or external transcription services, or simply helping users to work more flexibly, Philips has a solution for everyone. You can spend the valuable time you save concentrating on your actual work, increasing the profitability of your business.

## Industry-leading software to secure your company's success

Philips offers an extensive array of software that can be seamlessly integrated into the existing digital workflow. Anyone who creates written documents from voice recordings can benefit from this powerful workflow tool.

The range of software from Philips – consisting of SpeechLive, SpeechExec Pro, and SpeechExec Enterprise – includes the ideal solution for companies of any size, whether they prefer a local (on-premise) or cloud solution, and whether their environment is made up of only a few laptops or is a complex infrastructure spanning several subsidiaries and countries.

SpeechExec Pro and SpeechLive can be used together to benefit from simple workflow management, even greater mobility, and cloud storage capabilities.

### SpeechLive Web Dictation and Transcription Solution

#### Ideal for

- Companies of any size
- Working anywhere on any device
- Use of speech recognition and transcription service as required
- Use of smartphone app and Philips voice recorders
- No complex IT infrastructure required

3 or 12-month subscription

### SpeechExec Dictation and Transcription Software

#### Ideal for

- Small to medium-sized companies
- Workflow management between authors and transcriptionists
- No specific need for cloud solutions and mobility
- Seamless integration of speech recognition software from Nuance (e.g., Dragon Legal Group)
- Optimized for Philips voice recorders

12 or 24-month subscription

### SpeechExec Enterprise Dictation and Transcription Solution

#### Ideal for

- Companies with more than 10 users
- Integrating speech recognition software from Nuance
- Managing licenses and hardware centrally across multiple sites
- Integrating into IT and industry-specific information systems from third-party providers
- Use of smartphone app and Philips voice recorders

12 or 24-month subscription

”

*We're affected by the skills shortage here in the legal profession too, so solutions that help us do a job ourselves are to be welcomed. The speech recognition solution really makes a big difference.*

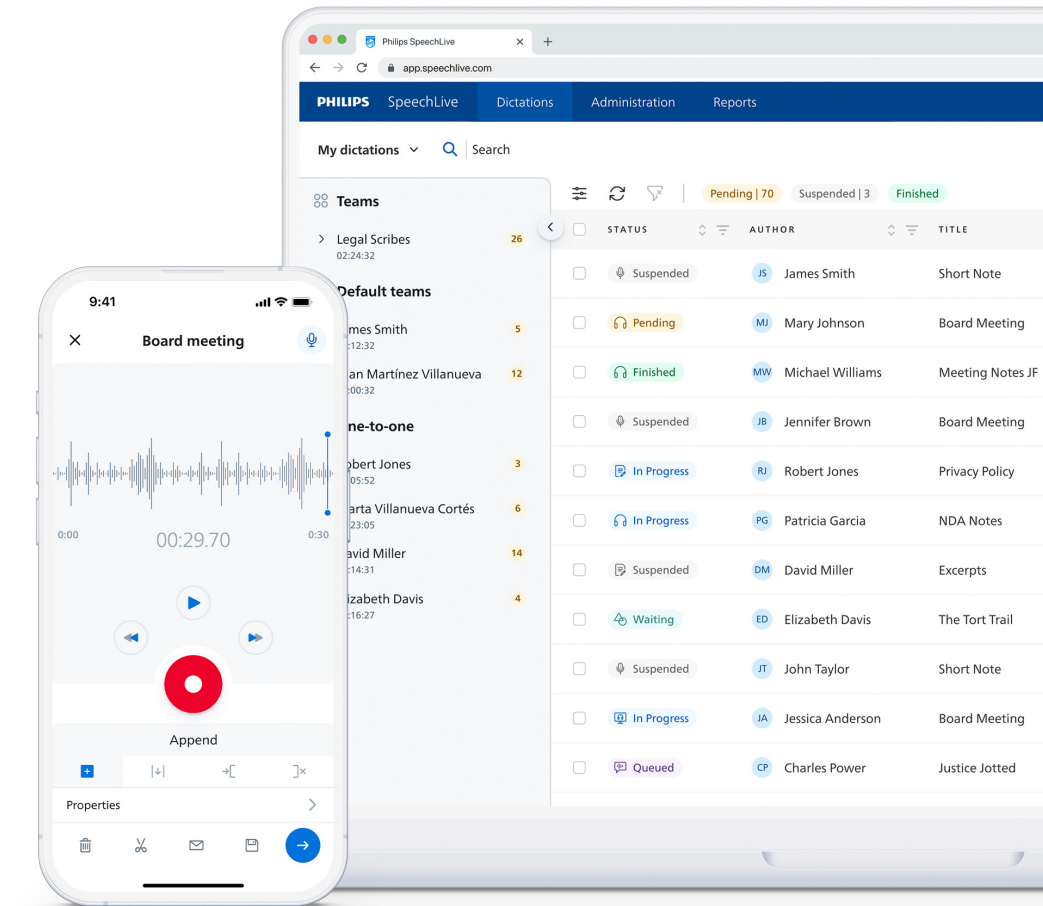

**Matthias Kucera**  
Kucera Rechtsanwälte OG  
Hard, Austria

## SpeechLive Web Dictation and Transcription Solution

The flexible SpeechLive Web Dictation and Transcription Solution makes it easier than ever to turn speech into text. The software enables you to work from anywhere and maintain full control of the entire dictation workflow – whether you're in the office or on the go. SpeechLive also offers front-end and back-end speech recognition, as well as a transcription service provided by trained transcriptionists.

- Cloud dictation solution for authors and transcriptionists
- Work using your smartphone, anywhere and anytime
- Web-based recording and playback control with dictation hardware and foot controls from Philips
- Compatible with all mobile voice recorders making it quick and easy to upload the dictation
- External transcription service where needed
- Speech recognition options: in the SpeechLive web application, in all desktop applications, and in the SpeechLive smartphone app.

”

*Our intention was not to cut back on staffing costs, but to increase quality by improving the relationships with our patients.*

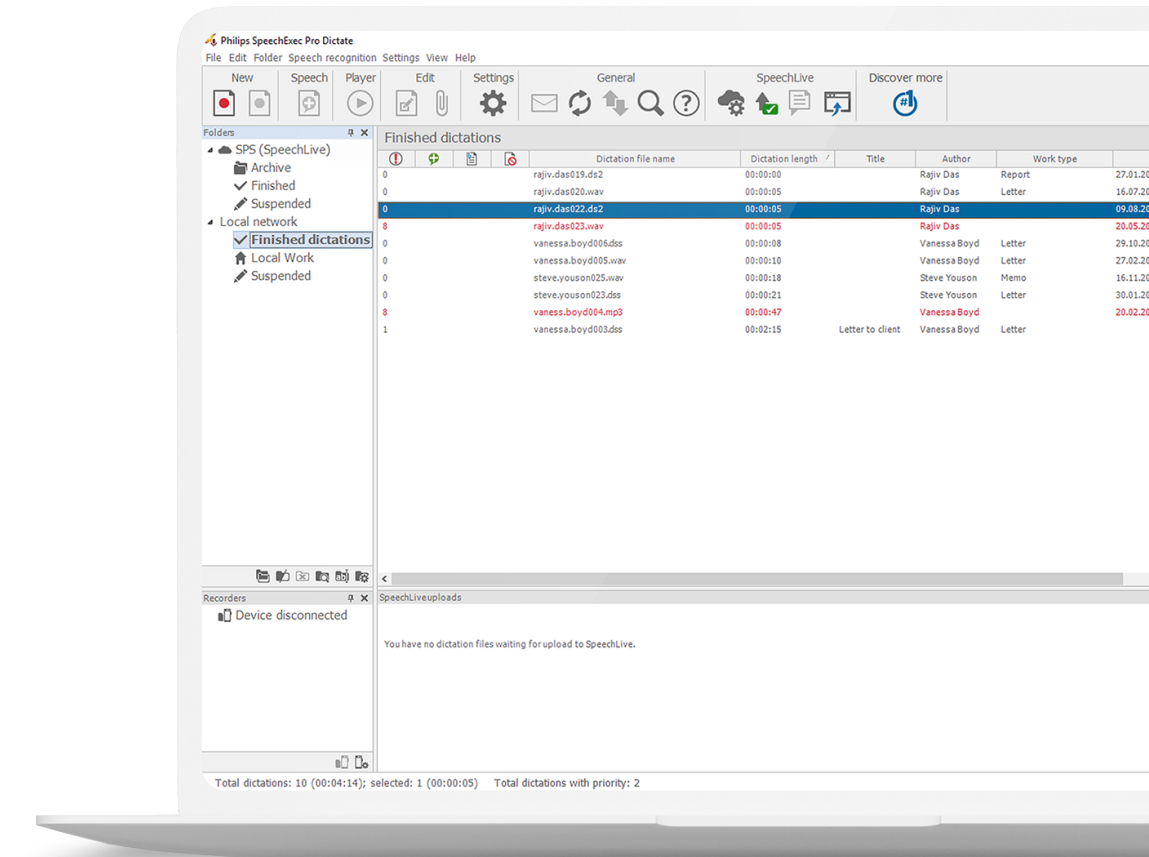

**Dr. Gérald Rigou**  
Teleradiologist, France

## SpeechExec Pro Dictation and Transcription Software

Philips SpeechExec Pro Dictation and Transcription Software connects authors and transcriptionists. It facilitates communication, the setup of individual workflows, and organizational flexibility to help save time and resources. Authors can dictate directly into the software using dictation microphones from Philips or upload recordings from a mobile Philips voice recorder. The files can then be played back and transcribed with ease using the foot control.

- Convenient direct dictation using microphones and headsets from Philips
- Use of smartphone app and Philips voice recorders
- Popup notifications for new tasks requiring attention
- Encryption and backup functions for maximum security
- Philips SpeechLive connection available for even greater mobility and speech recognition

”

*The main advantage of the new system is that both the software and the dictation files are stored on a central Citrix server. This can be updated almost instantly, no matter where the physician or secretary are working. They can access the data whenever they want.*

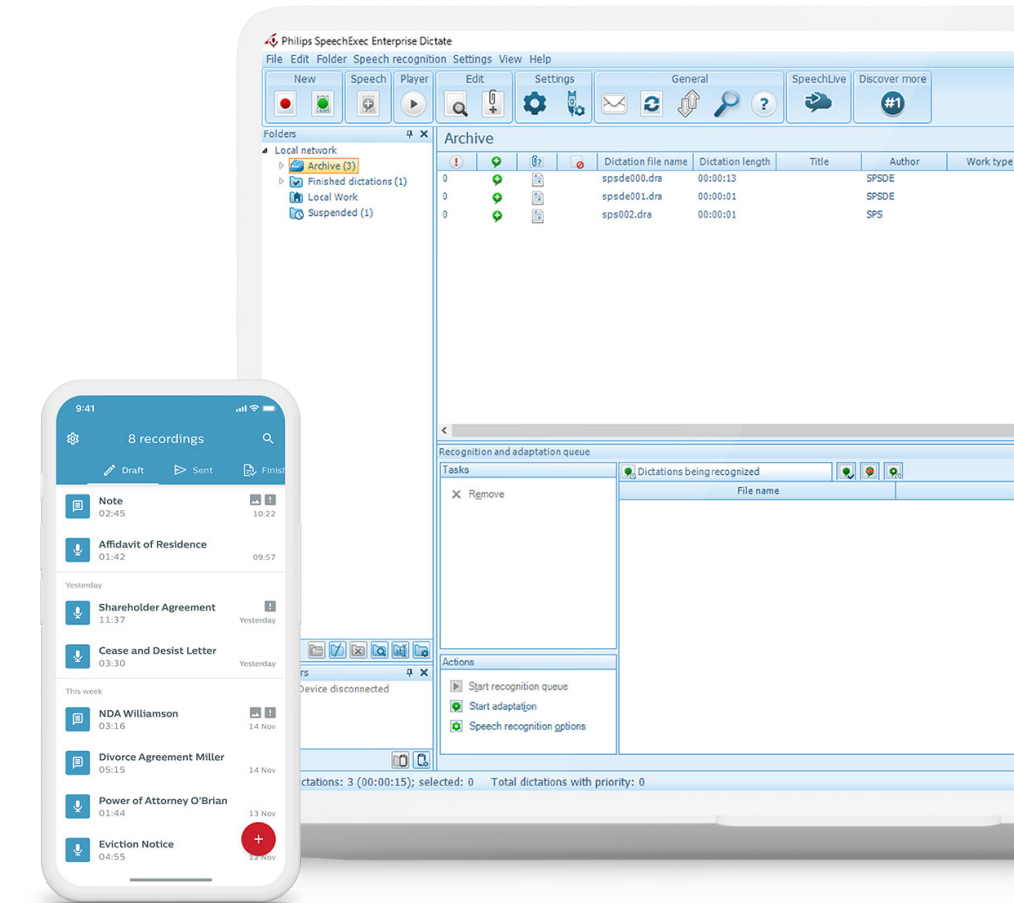

**Jesper Pedersen**  
Head of the IT Department  
Aleris-Hamlet private hospital

## SpeechExec Enterprise Dictation and Transcription Solution

Larger organizations will benefit from the Enterprise solution. All workflow settings, input devices, and the dictation app can be managed and configured centrally. What's more, the solution supports Microsoft RDS (Microsoft Remote Desktop Services), Citrix, and VMware, which makes installation and IT administration much easier. The speech-to-text software from Philips can easily be integrated into your existing IT infrastructure and into third-party software, such as industry-specific information systems.

- Convenient direct dictation using microphones and headsets from Philips
- Automatic uploads from mobile voice recorders like the Philips PocketMemo
- Integration of Nuance speech recognition software with specialist vocabulary (Medical One, Medical Direct, Legal Anywhere, Legal Professional)
- Central administration and Active Directory function to manage settings more easily
- Remote environment support for on-demand application delivery
- Speech recognition can be combined with transcriptionists in the workflow
- Separate audio files make it easy to proofread text generated using speech recognition

## A global market leader you can trust
